CHAPTER 1 INTRODUCTION

1.1 Geographical Setting of the District.

Karnal District lies on the western Bank of river Yamuna which once flows about 11 Kilometre to the east forming eastern boundary of the district. The river Yamuna separates Haryana from Uttar Pradesh. The Karnal District Including Panipat lies between 29°09'50" and 29°50' North latitude and 76°31' 15" and 77°12'45" East longitude, its height from sea level is between 235 and 252 meters. The Karnal District is surrounded by Kurukshetra District on its north-west, Jind & Kaithal Distt. on its west, Panipat District on its south and Uttar Pradesh on east. Total population of Distt. Karnal as per 2011 census is 15,05,324 out of which 7,97,712 are male and 7,07,612 female. Population density is 597 persons per sq. Km. covering total area of 2520 sq. Km. The District comprises of 434 villages including 17 villages non-inhabitant.

Karnal is important city on Delhi, Ambala Rail Line & Sher Shah Suri Marg (G.T.Road), connected with all important places in the country. It is 123 Kilometer from Delhi & 130 Kilometer from Chandigarh.

Yamuna River forms eastern boundary of the district and flows from North to South. The district is a part of the Ganga-Sindus (Indo-Gangestic) plains and has a well spread network of western Yamuna Canal. Its geographical area has been divided in to three agro-climatic regions, Khadar, Bhangar and Nardak belt. Khadar starts from Indri-Karnal road one mile away from Karnal covering the area in between Yamuna River and National Highway Road No.1. Bhangar area starts from west of Khadar area covering Gharaunda, development block. The Nardak area lies in Nissing, Nilokheri and Assandh development block. However, its water is saline and not fit for irrigation.

CHAPTER -2 DRAINAGE SYSTEM

2.1 Drainage System in the District

In the above context, it is intimated that all efforts for flood Preparedness 2020 has been made. Indri W/S Division, Karnal works under the control of Yamuna Water Services, Karnal. The division has its jurisdiction with drains, canal and Yamuna River. To face with the fury of flood problem to drain out the surplus rain water efficiently, there is a network of 33 Nos. drains having about 200 Km. length. The drainage network covers the Indri, Karnal & Gharaunda Block of Distt. Karnal. The River Yamuna with 87 Km. length falls in the jurisdiction of this division. The detail of drains/River are given below:-

CHAPTER – 3, FLOOD VULNERABILITY IN THE DISTRICT

3.1 Brief History of past floods in the district

Date/ Year	Details
1978	Record flow of water to the tune of 7.14 lacs cusecs and heavy loss was caused on account of heavy floods at that time.
2010	Maximum flow of water to the tune of 7.45 lacs cusecs was recorded twice thereby beating the record of last 38 years. The total discharge passed in river Yamuna during year 2010 comes out to be 8.45 MAF. The average peak discharge at the Head Tajewala for the last 50 years as per record comes out to be 7.44 Lac. Cusecs. Sometimes, the heavy discharge in river Yamuna generated by the heavy range in the catchments of Utrakhnad and released from Tajewala head work, affects no. of villages situated along the river.
17.06.2013 / 2013	Maximum discharge of water was 806464 Cusec. In this year flood occurred in various places of Karnal district which is near to Yamuna embankment.
17.07.2014 / 2014	Maximum discharge of water was 128339 Cusec.
16.08.2015 / 2015	Maximum discharge of water was 101360 Cusec.
16.08.2016 / 2016	Maximum discharge of water was 4983.80 Cusec.
2017	Maximum discharge of water was 1.47 Lakh Cusec from HKB Yamuna nagar.
2018	Maximum discharge of water to the tune of 6.05 lacs cusec. In this year flood occurred in various places of Karnal which is near to Yamuna embankment.

2019	Maximum discharge of water to the tune of 8.28 lacs cusec was recorded in river Yamuna. The heavy discharge in river Yamuna generated by the heavy rain in the catchment of Uttrakhand and released from Tajewala head work, affects No. of villages situated along the river in district Karnal.

3.2 Flood Risk and Causes of flood in the District

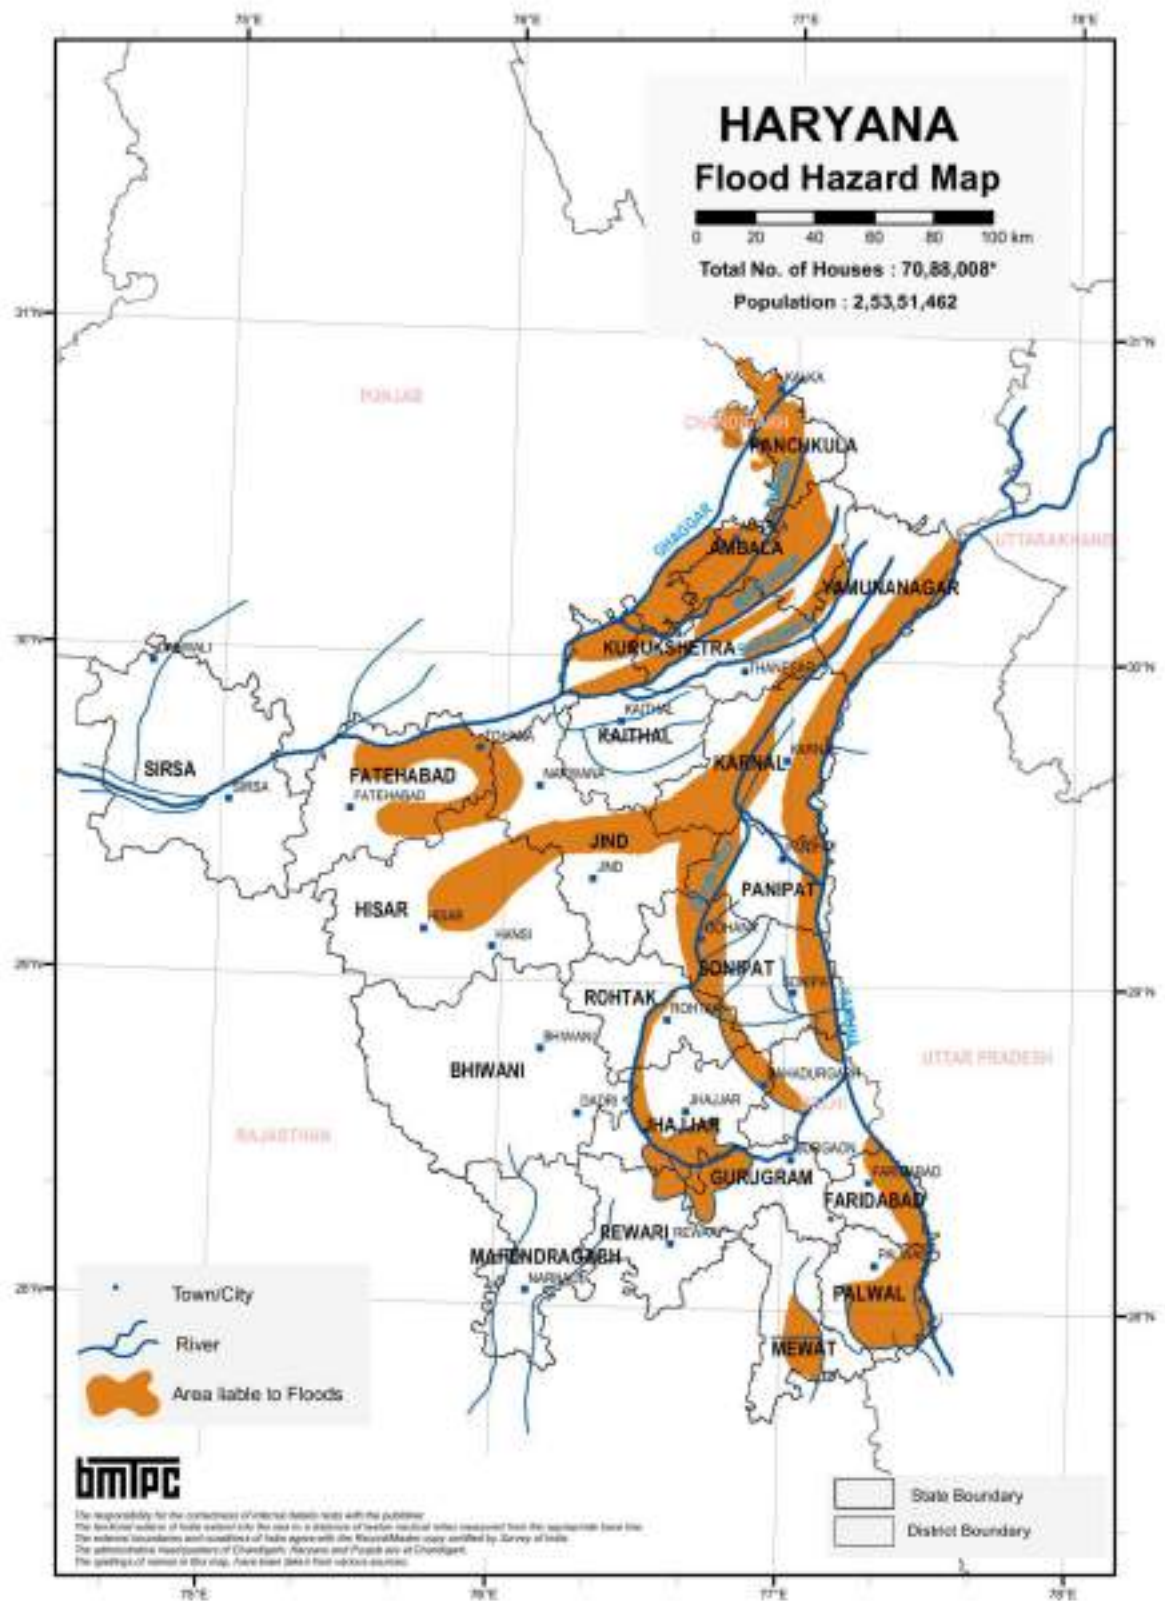

A. Inundation caused by River Yamuna

River Yamuna is the only river flowing along the entire eastern boundary of Distt. Karnal. The River Yamuna with 87 Km length falls in jurisdiction of district Karnal and out of which there is no embankment along with the river in a length of 5.44 Km right from village Chandraon to Chaugaon.

B. Inundation caused by local rainfall

There are some low lying areas where excessive rain water accumulates and creates flood like situation. Nissing and Assandh fall in this category. During the year 2012 some erosion has been occurred at some agricultural land sites (Kalsora, Dabkoli, Kunda Kalan complexes) due to receipt of flood to the tune of about 1.00 lac . Cusecs and continuous flow of water in river Yamuna. The erosion of valuable agriculture land had taken place in a length of about 1750 Ft. The pumping sets are generally installed as per field requirement and preference is given to the abadi area.

3.3 Flood Hazard Map of the District

BMTPC : Vulnerability Atlas - 3rd Edition; Peer Group, MoHA; Map is Based on digitised data of SOI, GOI; Census of India 2011; Flood Atlas (1987), Task Force Report (2004), C.W.C., G.O.I. Houses/Population as per Census 2011; * Houses including vacant & locked houses. Disclaimer: The maps are solely for thematic representation

3.4 Flood Prone Area/Vulnerable in the District

RURAL AREAS:

All the villages particularly situated along river Yamuna are the critical areas to be taken care. Areas which is near to river complexes such as **Nabiabad, Sayad Chhapra, Japti Chhapra, Garpur Tappu, Khirajpur, Kundakalan, Jammukhala, Balhera, Chandron** and **Shergarh** Tapu are the vulnerable sites where river cause damages. Some other vulnerable areas which need special attention during Monsoon are **Chitang Nallah**, villages near Nissing and Nigdhu area.

VILLAGES AFFECTED BY RIVER YAMUNA FLOOD

Following villages are affected by river Yamuna flood/water.

URBAN AREAS:

There are six municipal towns in Karnal Sub-Division namely Karnal, Gharaunda, Indri, Nilokheri Taraori, Nissing and one town in Assandh Sub-Division i.e Assandh. These towns stand divided into Municipal wards, Secretaries/Executive officers of every town shall send lists of the flood prone areas showing the necessary flood protection measures/necessary steps to face the floods, so far taken/are being taken. . There are certain depression/low lying areas of the town where dewatering is done every year by the Public Health Deptt. The water entered in the District Karnal through SYL as well as by sheet flow and heavy rains. During the year 2009-2010 & 2010-2011, Low lying areas of some colonies of this town were surrounded by rainy/flood water from 2 to 4 ft. As usual public Health Deptt. will be responsible to provide diesel pumps to drain out the accumulated flood to save the Abadies and properties of the people of these towns. The list of relief material available including engines, pumps etc. installed at different locations and other arrangements has been done.

A Activities of Flood Control Room

a. Communication

Advance information about gauge reading/discharge of water in Yamuna river will be made available to the operation control centre and District Flood Control Room by XEN, I.W.S. on daily basis so that preventive measures to combat flood threats could be taken well in advance. XEN, Irrigation will make fool proof method of communication of flood form one focal point to another so as to know the extent of flood water discharge at various control point. Liaison will also be maintained by the XEN, Irrigation with focal points of control of the discharge of water of Yamuna River including Tajewala Head to know useful information about floods/discharge.

Moreover, a comprehensive network of the communication at the police stations will also be setup.

b. Combating the flood threat official team.

The Civil Defence and Home Guards personnel will be kept in readiness for rescue, relief, First aid operation at short notice. Concerned Patwari/Kanungo/Gram Sachives will be directed to be present at their respective village headquarters and assist the Gram Panchayat in dissemination of the flood warning and mobilizing volunteers to combat flood threats. Village Panchayat and Numberdars shall be actively associated with relief operation.

5.2 Pre-Flood Inspection

Before the monsoon season the Distt. Administration always did joint flood inspection with the concerned department to lessen the impact.

Even after taking all the preventive steps and precautionary measures the possibility of occurrence and recurrence of flood cannot be ruled out. Therefore, to meet any emergent situation arising out of such inundation of varying magnitudes, various preventive and relief measures have to be taken by the District Administration to minimize the gravity of an impending threat. Keeping this fact in view, flood control room would be functioning at the District Headquarter under the supervision of District Revenue Officer. The concerned SDMs and XENs will be putting their efforts to combat any threat of floods. They will be assisted by Senior Officers of Irrigation Department Revenue Department/BDPOs and their field level functionaries. Concerned BDPOs will be in charge of Flood equipments like Life Jackets, Boats, OBMs, kits for divers etc. and provide all sorts of help including the services of specially trained official for flood purposes. A list of flood-prone villages has been prepared on the basis of previous years experiences and special attention will be paid to these villages during floods.

Pre monsoon flood inspection under the supervision of worthy deputy commissioner, Karnal on dated 02nd Jan, 2020.

5.3 Flood Warning System

In this District, flood is caused by over-flow of River Yamuna by excessive rainy water. Flood warning is sent by the S.D.O. Irrigation from Tajewala Head works through Canal wire or by wireless to the Deputy Commissioner, Karnal as well as to the District Flood Control Room (DC's Office) i.e to the address of Officer-in-charge, Flood Branch (DRO) Karnal as well as S.E. Irrigation who will further convey it to all the SDO (C) and Tehsildars concerned for information and necessary action.

Immediately on receipt of warning of High Flood exceeding 2.50 lacs Cs., the Deputy Commissioner would be informed through quickest possible means and likewise the Supdt. of Police would be informed, who would arrange for police squads to be dispatched to the sensitive zones for necessary help. The Tehsildar/ NaibTehsildar would immediately be alerted to dispatch the information to the Zonal/Sector Officer of the areas in danger and they in turn would immediately alert the Panchayat concerned. The SHOs would ensure that the ferryboats are made available during the emergency.

District Public Relation Officer, Karnal would keep one or more (according to need) loud speakers fitted jeep (s) ready for announcement in all concerned villages regarding the warning of flash floods. Village functionaries will also ensure to relay the information to the villagers by beat of drums/available measures. The field machinery i.e. Patwaris, Gram Sachives, CROs & B.D & P.Os will stay at the Head-Quarter during flood season and will not leave their headquarter without prior permission of their controlling officers until the flood relief measures are completed and floods have receded completely.

5.7 Preparedness measures for COVID-19 in case of Flood

While all the above preparedness measures are undertaken, it is necessary to keep in mind that we will be preparing and responding to disasters amidst our fight against COVID-19 (containment, preparedness, treatment etc.). Hence, the following additional precautions/ measures should be taken while we prepare for floods/ urban floods:

- a) Checking whether quarantine/isolation facilities are located in the flood prone areas and if necessary, moving them to safe areas or taking measure to ensure that they are not affected by floods.

- b) During mass evacuation in case of flood, necessary measures need to be taken to ensure physical distancing, avoiding over-crowding, wearing necessary face masks by all etc.
- c) Due to the need to maintain physical distancing, there will be considerable reduction in the capacity of the flood shelters to accommodate evacuated/ affected people. Keeping this in mind, the capacity of flood shelters needs to be reworked and additional shelters need to be identified and prepared well in advance. Also, additional toilets and other arrangements also need to be made even in the existing shelters to ensure that COVID-19 spread does not happen in the flood shelters or relief camps. Adequate feeding in the shelters.
- d) Regular medical checkups are required in the camps/ shelters to ensure that people with symptoms are isolated and treated so that COVID-19 spread can be prevented.
- e) The first responders and staff involved in disaster evacuation, rescue and relief activities (Police/SDRF/Fire Services/Home Guards/ Civil Defense or any other volunteer) should wear adequate personal protective equipment(PPE). Hence, the State Governments should assess the need for PPEs for disaster management purposes and make arrangements for the same.
- f) Management of concurrent disaster of flood and COVID-19 will need additional infrastructure, human and material resources and revision of our preparedness and response plans. Hence the District Administrations should rework the requirement of resources for managing flood in the light of the existing COVID-19 pandemic situation.
